Goals of Kiddie Campus

Kiddie Campus is a developmentally appropriate program that helps each child expand his/her environment and develop a positive self-image. We strive to create a warm, protected, stimulating first school experience. Our program offers children an opportunity to grow physically, socially, emotionally, and intellectually. This is done through a variety of hands-on activities such as music, art, games, field trips, stories, and special visitors. The children will also share experiences in language, science and math concepts. We strive to promote each child's individualism and creativity, while encouraging children to cooperate with others as a member of their peer group. Each child has a chance to lead, follow, to share, take turns, and to learn to respect the rights of others. Academically, children are introduced to colors, shapes, letters, number concepts, and language skills. Hands-on activities such as cooking, sand and water play, and science experiments, make these subjects fun to experience.

Part of a child's social development is his/her ability to learn to relate to adults other than his/her parents. Our safe, cozy environment and loving staff strives to instill trust in each child to make transition easier. We want each child to leave Kiddie Campus feeling he/she can accomplish any task, large or small.
